Computer Engg. Department

Expert Lecture on DBMS

Computer Engineering Department of A.Y.Dadabhai Technical Institute, Kosamba has arranged an expert lecture on **Database Management System** for **3rd Semester** students on **23rd September 2017**. As per the Curriculum of 3rd Semester Diploma in Computer Engineering , students have to study SQL Query, Key Constrains etc in subject, named Database Management System. A.Y. Dadabhai Technical Institute is very much concerned about the Professional Development of each Student. Computer Engineering Department also takes regular steps to fulfill the Institute's vision and as well as Department's own vision. To pursue this vision Computer engineering Department organizes various Quiz Competition and Expert Lecture for Computer engineering Students. **Mr.Jayesh Chaudhary [Assistant Professor]** from Sarvajanic College of Engineering, Surat has shared his Experience on Applet and Abstract Window Toolkit. He had spent 2 hours for the Expert lecture.

Now a day's DBMS is used in different areas like Software development, Android Apps, Server Apps at Financial Services Industry, Web applications, Software Tools, Trading Application, any software which uses database in any platform or language. Mr.Jayesh Chaudhary explain about Basics of Database management System, Primary Key, Unique Key, Foreign key, different SQL commands.

The Expert Lecture was very helpful to the Students. As they were able to know the things to which they were unknown till date. Students had also asked some queries at the end of expert lecture and exaggerates their gratitude for the Expert Lecture planned by the Computer Department of the Institute.

Glimpse of Expert Lecture
